SKILLS

CLO 3D (Advanced, FIT)
CAD · pattern construction
Generative AI — image & video
Blender · Adobe Substance
Photoshop · Illustrator
AI web/app prototyping
MS Office (MOS) · Notion

ABOUT ME

I spent over 10 years as a womenswear designer at Handsome, LF, SK Networks, and F&F, running the full cycle from planning and sourcing through production. The most expensive problems were always the same: repeated samples, some made only to be presented to executives, and miscommunication between HQ, factories, and buyers. Few womenswear teams in Korea use digital tools to fix this, but I learned CAD, CLO 3D, and generative AI to find out whether those problems were actually solvable.

From CLO user to CLO practitioner

I have been following CLO since 2017, when I first saw it at a global garment vendor. FIT's Garment Visualization / CLO 3D Advanced program made it my own practice, and Tommy Hilfiger made it real work: rebuilding CAD patterns in CLO for the Asia-fit pants development and reviewing fit revisions with PVH APAC in 3D. Since then: Blender, Adobe Substance, generative image and video AI, and a patent-pending method for designer-workflow-based garment design variation.

Why this role

3D adoption fails at the workflow, not the software. My patent decomposes that workflow into stages; my process reform at Tommy Hilfiger was the human side of the same work. Consulting, training, and supporting users need both. From traditional Korean womenswear houses to global-HQ license teams, sportswear, and a vendor's R&D floor: most CLO users work in a room I have already worked in. I have written English design reports and led fit reviews with global HQs, so working in English with global colleagues and users is familiar ground.

EXPERIENCE

- **Freelance Independent Designer** **Sep 2024 – Present**
Individual design work based on CLO 3D and generative AI, alongside small-scale branding projects and AI visual content production (virtual editorials, brand presentations). Sole owner of two F&F Sergio Tacchini capsule collections — item map → 2D flats → AI image generation → virtual editorial, completed single-handedly, including 60th-anniversary logo and hang tag development. Led key-item reviews for F&F DUVETICA 2025 S/S.
- **F&F / DUVETICA Head Designer** **Nov 2023 – Apr 2024**
Ran the 2025 S/S China sales conference; sole owner of the indoor collection.
- **Hansome / Tommy Hilfiger Women, License Design Team** **Nov 2022 – May 2023**
Freelance Design Lead
Led a production-process reform that moved the seasonal calendar 3+ months earlier to qualify styles for overseas manufacturing; expanded the factory base from domestic to overseas with stronger cost control. Rebuilt CAD patterns in CLO 3D for the Asia-fit pants development, exchanging pattern revisions and fit changes with PVH APAC in 3D. Led meetings and fit reviews with the Dutch HQ; unified HQ and trim-supplier communication.
